

ADVANCED TECHNOLOGIES IN SMART CROP FARMING

Digital transformation permeates all of our economic sectors, including agriculture. We are facing rapid technological developments that offer great potential but also require solid background knowledge.

Therefore, we offer a BOKU part-time program to provide the latest practical knowledge, tailored to the specific demands of professionals in agriculture!

Upskill your competences in:

Geo-Information-Systems (GIS),
Remote & Proximate Sensing,
Variable Rate Technology,
Automated Steering,
Section Control &
Farm Management Information Systems (FMIS)
